Notes:

<sup>2</sup> Computed by comparison to  $^{20}\text{Ne}$  signal in air pipettes. 1-sigma uncertainty includes measurement uncertainty of  $^{20}\text{Ne}$  signal in this analysis and the reproducibility of the air pipette signal

<sup>3</sup> Computed by comparison to  $^{21}\text{Ne}$  signal in air pipettes. 1-sigma uncertainty includes measurement uncertainty of  $^{21}\text{Ne}$  signal in this analysis and the reproducibility of the air pipette signal

<sup>4</sup> Isotope ratio measured internally during each analysis: does not involve normalization to the Ne isotope signals in the air pipettes.

<sup>5</sup> Analyses where cosmogenic  $^{21}\text{Ne}$  was not distinguishable from zero at 1 sigma are not shown. Cosmogenic  $^{21}\text{Ne}$  concentrations were calculated by normalization to either the  $^{20}\text{Ne}$  or  $^{21}\text{Ne}$  signal in the air pipettes, depending on which method yielded better precision.
